

Ctrl, Alt, Change

The Tipping Point, always aiming to actively support the educational community, implements, in collaboration with **Teleperformance Greece**, a **Computer Donation Program**.

"**Ctrl, Alt, Change**" strives to enhance the educational experience in schools across Greece by meeting their needs in technological equipment.

As part of the program, schools in the TTP network have the opportunity to get equipped with refurbished desktop computers. In this way, students even in the most remote areas of Greece are offered the chance to connect and interact with people and ideas from every corner of the world.

The program is implemented with the support of **Teleperformance Greece**, as part of its corporate social responsibility program.
