

Exploring new career prospects

With the goal of more effectively supporting and empowering young people in underrepresented areas, groups of students from Aperi Karpathos and Soufli Evros are given the opportunity to participate in The Tipping Point Program.

Through discussions with role models, professionals operating in different sectors, the participants of the programme experience the everyday life and requirements of various professions. As a result, they broaden their horizons and have the opportunity to learn about different career paths and opportunities.

In support of young people, **Sanofi innovative biopharma company** employees take on the role of mentors, sharing their knowledge and providing students with the necessary impetus, inspiring them to forge their own path.

The Tipping Point Program is being implemented in 2 schools across these regions, with the support of **Sanofi**, for the **2023/24** school year.
