

Supporting students' future across Greece

The non-profit organization, **The Hellenic Initiative Australia (THI Australia)** from 2019 to date has consistently supported the work of The Tipping Point by providing schools across Greece with the opportunity to participate in The Tipping Point Program.

The majority of the regions supported are located in remote areas where young students have limited access and inspiration in terms of career pathways and prospects. With the help of technology, through live group sessions, participants have the opportunity to meet with professionals who, assuming the role of mentors, share their work experiences, knowledge and answer their questions about their field of activity, all this from the comfort of their classroom .

For the 2023-2024 school year, **The Hellenic Initiative Australia** is supporting the implementation of the program in 10 schools, expanding the reach of the program to new areas, in Eratyras Kozani, Kalambaki Drama and Thebes.
